

Dialogue Overview and Objectives

Yamil Bonduki

Manager, Low Emission Capacity Building Programme, UNDP

NDC Regional Dialogue for Latin American and Caribbean Region

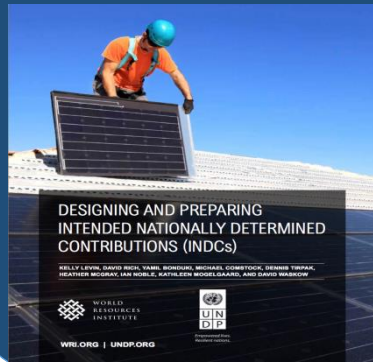

Costa Rica, 19-21 July 2016

UNDP's Work on INDCs

Direct INDC Financial/
Technical Support
(43 developing countries)

12 INDC
Dialogues &
Workshops
(110 countries)

Designing
&
Preparing INDCs
(Guidance with WRI)

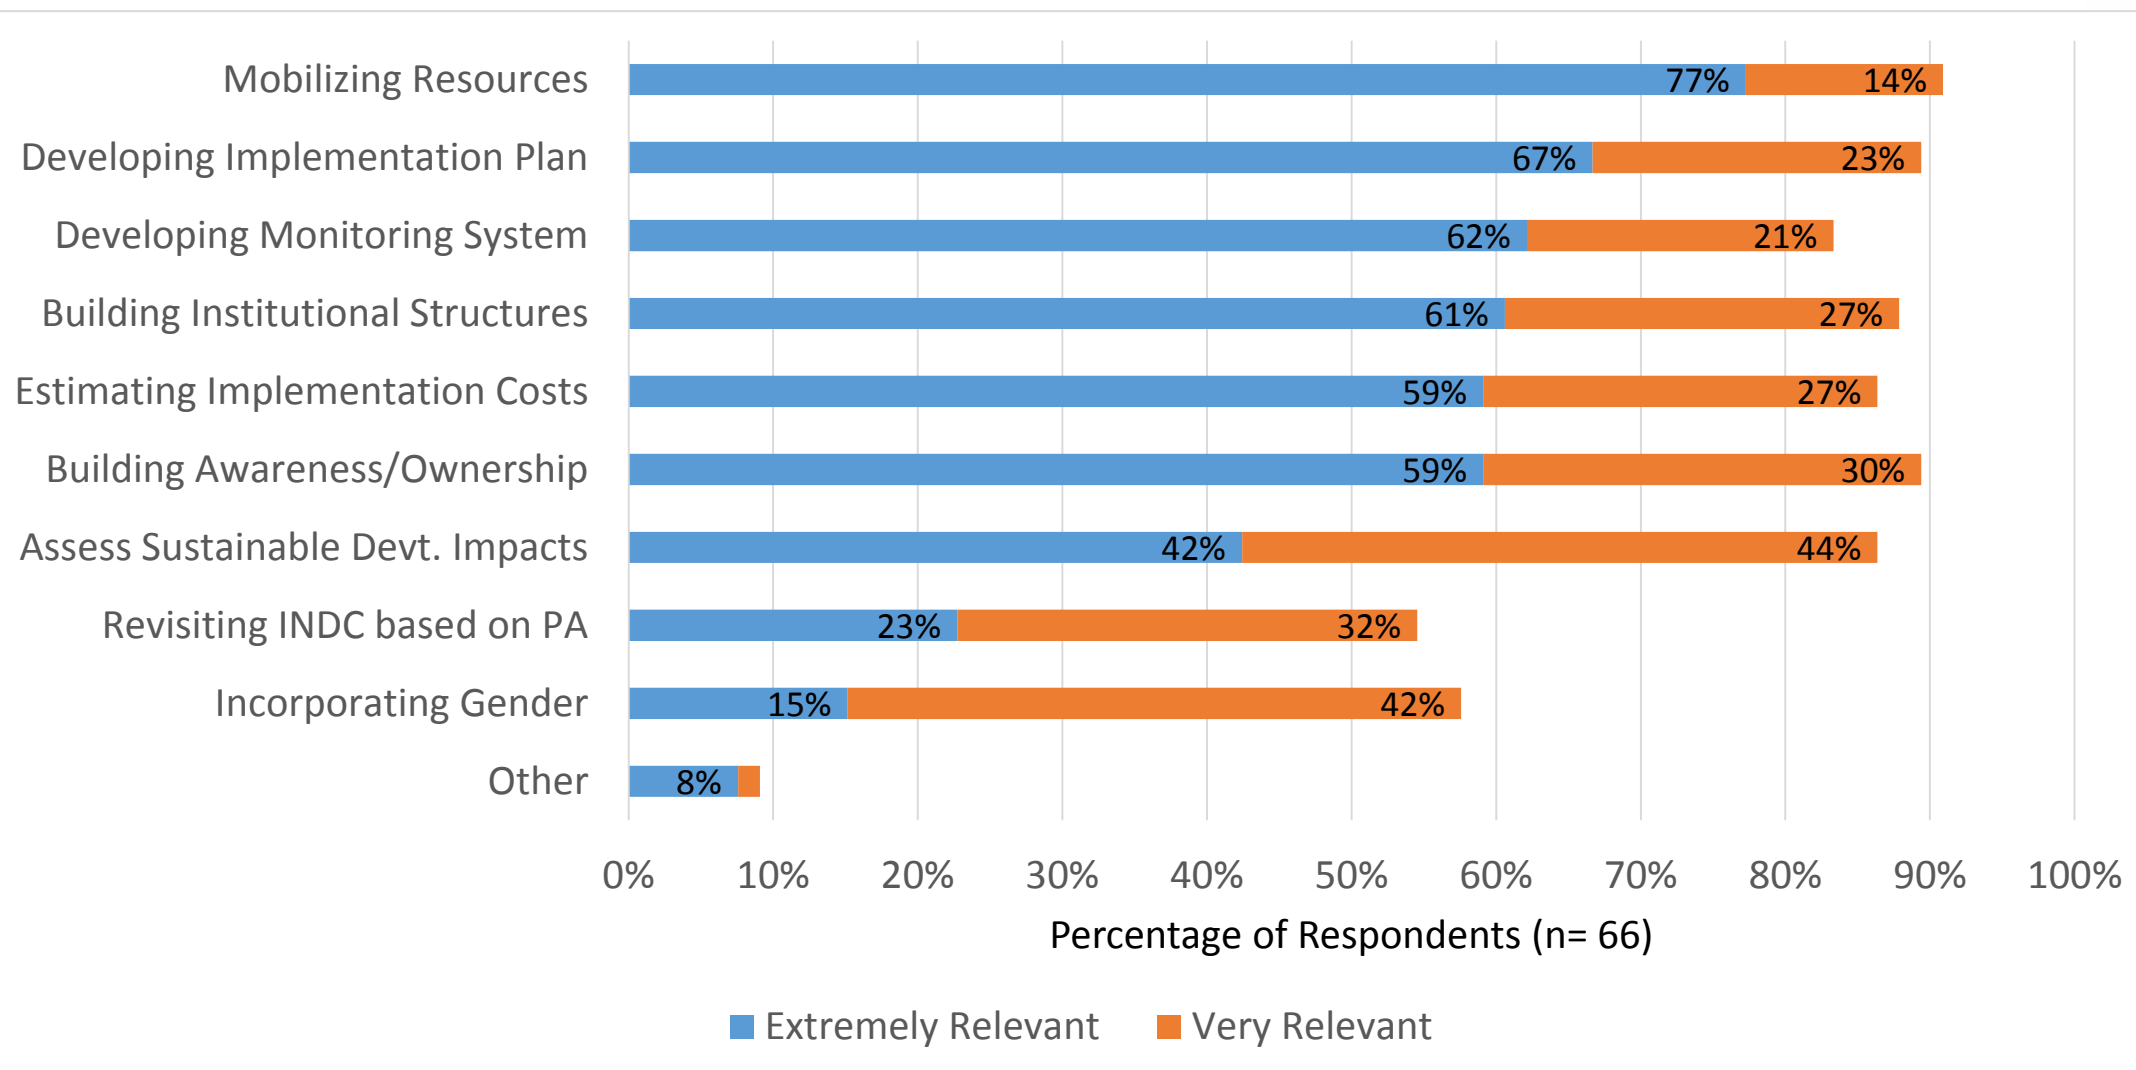

UNDP Low Emission Capacity Building
Programme
GHG Inventories, LEDS, NAMAs, MRV,
Private Sector → INDCs
(25 countries)

On-Going Climate Change Programs Related to INDCs
(Adaptation, Finance, etc.)

UNDP Survey on NDC Support Needs

Empowered lives.
Resilient nations.

Dialogue Objectives

*Empowered lives.
Resilient nations.*

- Take stock of submitted (I)NDCs from the region and implications for national implementation;
- Discuss next steps in preparing for NDC implementation at the national;
- Provide a forum for exchanging country experiences and perspectives on planning for NDC implementation; and
- Discuss key technical and institutional issues related to NDC implementation

Dialogue approach and format

- Key areas of NDC implementation, e.g. institutional structures, implementation plans, monitoring progress of NDC goals, resource mobilization, adaptation actions, etc.
- Plenary sessions will introduce each of these technical areas followed by experiences from countries and discussions
- Working group sessions
- Informal discussions and learning from each other
- Networking
- Forward looking

*Empowered lives.
Resilient nations.*

Building on and improving what exists

- Many different existing initiatives should provide inputs to the NDC implementation process
- A few UNDP supported areas of work, as an example:
 - The Low Emission Capacity Building Programme
 - NAP Support Programme (with UNEP)
 - GSP for National Communications and BUR (with UNEP)
 - GCF Readiness Programme
 - Large mitigation and adaptation portfolio with funding from different sources, e.g. GEF, donors, track funding, collaboration with other institutions, GCF (more recently), among others.

Key messages

- NDC implementation will require creative and ambitious approaches
- Institutional structures will need to be enhanced and strengthened, e.g. NDC implementation cannot rest solely on ministries of environment
- Proposed and foreseen actions should be engrained in countries' long-term vision
- An “incremental” approach to NDC implementation may be advisable (learning by doing and strategic gaps filling)
- Systems to track progress are essential to the success of NDCs and will require strong government buy-in and adequate resources
- Financial resources to support NDC implementation would need to look at blending different sources of funding

*Empowered lives.
Resilient nations.*

Thank you
