

Good practice points

- Use the TER process to create a better BTR, e.g. note questions you want to ask during the process.
- The FMCP mainly serves the sharing of information. Although Party delegations do not necessarily coincide with the experts who have compiled the BTR, it is helpful for your team to include a technical expert who participated in BTR compilation.
- Work closely with the UNFCCC secretariat once the BTR is submitted to clearly understand the processes involved.
