

# Tracking Progress with Common Tabular Formats

Alyssa Ng

International Policy, Policy and Planning Division

National Climate Change Secretariat

19 October 2019

## **CTFs Presented:**

1. Indicators
2. Methodologies
3. Structured Summary (w/o 77d) and NDC Achievement

## **CTFs Not Presented:**

1. NDC Accounting Approach
2. 77d in Structured Summary
3. Addressing social and economic consequences of response measures

# Table 1 – Indicators

	Definitions	Relation to NDC	Units	Reference type	Reference level*	Reference year	Target level*	Target year
Description of indicator #1 (most recent)								
Description of indicator #2 (most recent)								
Description of indicator #1 (previous reporting year)								
Description of indicator #2 (previous reporting year)								

\*cells where the value has changed from the previous reporting year to be marked with a coloured cell to identify them as updated values

## Table 2: Methodologies

	Key parameters, assumptions, definitions, data sources and models	IPCC Guidelines	Metrics	Assumptions, methodologies and approaches specific to sector, category, activity, mitigation co-benefits and cooperative approaches	Methodologies for tracking progress on implementation of policies and measures	Other methodologies	Conditions and assumptions relevant to achievement of NDC
Description of Target #1							
Description of baselines #1							
Description of indicator #1							

\*cells may be merged where appropriate as baseline and indicator(s) for a particular target may be the same.

\*\* cells where requested information is not applicable, to indicate 'NA'

## Table 3 – Structured Summary (w/o 77d) and NDC Achievement

	Reference point(s), level(s), baseline(s), base year(s) or starting point(s)	Units	Most recent information for reporting years of NDC implementation				Target Level as per NDC	Assessment of achievement
			Reporting year 1	Reporting year 2	....	Reporting year 5 / target year of NDC		
Indicator (repeat rows as necessary)								
GHG emissions and removals								
LULUCF emissions and removals								
[Placeholder for 77d]*								

\*may not be compatible with structured summary based on Reporting Year 1/2/3 etc since annual emissions data is required but RY is biennial.

# Thank you

Any comments and feedback would be much appreciated 😊
