National Adaptation Plan (NAP) M&E and the Enhanced Transparency Framework

Deborah Murphy
PATPA - 8th Workshop for the Regional
Group for Anglophone Africa
8-10th May 2019

Overview of NAP and M&E Session

Overview

- Objective: To understand how NAP M&E fits in the ETF
- Presentation – NAP process, NAP M&E and the ETF
- Q&A

What is the National Adaptation Plan (NAP) process?

- Formally established in 2010 by the **UNFCCC** under the Cancun Adaptation Framework
- A **domestic process** that integrates climate adaptation into development planning and budgeting at national, sectoral and sub-national levels.
- **Ultimate outcome:** Reduction of a country's vulnerability to climate impacts in medium- and long-term
 - Articulate priorities
 - Enhance coordination
 - Attract investment

Why emphasize NAP “planning process” vs. actual “plan” ?

Adaptation planning
is **ongoing, iterative**
– i.e. does not end
with a document

Process as (more)
important than result
– changing the way
countries plan for
their development.

The NAP Process

M&E a critical part of the NAP process

Adaptation and NAP M&E

- NAP M&E (and sector NAP M&E) should part of the broader adaptation M&E system
- Progress and outcomes of priority adaptation actions – set out in NAPs, action plans, NDCs
- Adaptation/NAP M&E feeds into/ provides data and information for domestic and international reporting

Adaptation M&E and the ETF

Adaptation/NAP M&E contributes to ETF of the Paris Agreement

- Global adaptation goal assessed through global stocktake; informed by Adaptation Communications
- Progress on achievement of adaptation NDC
- Reporting on adaptation support received

Adaptation Communication

- Decision adopted by CMA in December 2018

https://unfccc.int/sites/default/files/resource/cma2018_3_add1_advance.pdf#page=23

Purpose:

- (a) Increase the visibility and profile of adaptation and its balance with mitigation
- (b) Strengthen adaptation action and support for developing countries
- (c) Provide input to the global stocktake
- (d) Enhance learning and understanding of adaptation needs and actions

Country-driven and should not pose additional challenges for developing countries

Adaptation communication can be **a component of or in conjunction with other documents, including a NAP or NDC**

Adaptation Communication

Annex: Elements of an adaptation communication - To include information on:

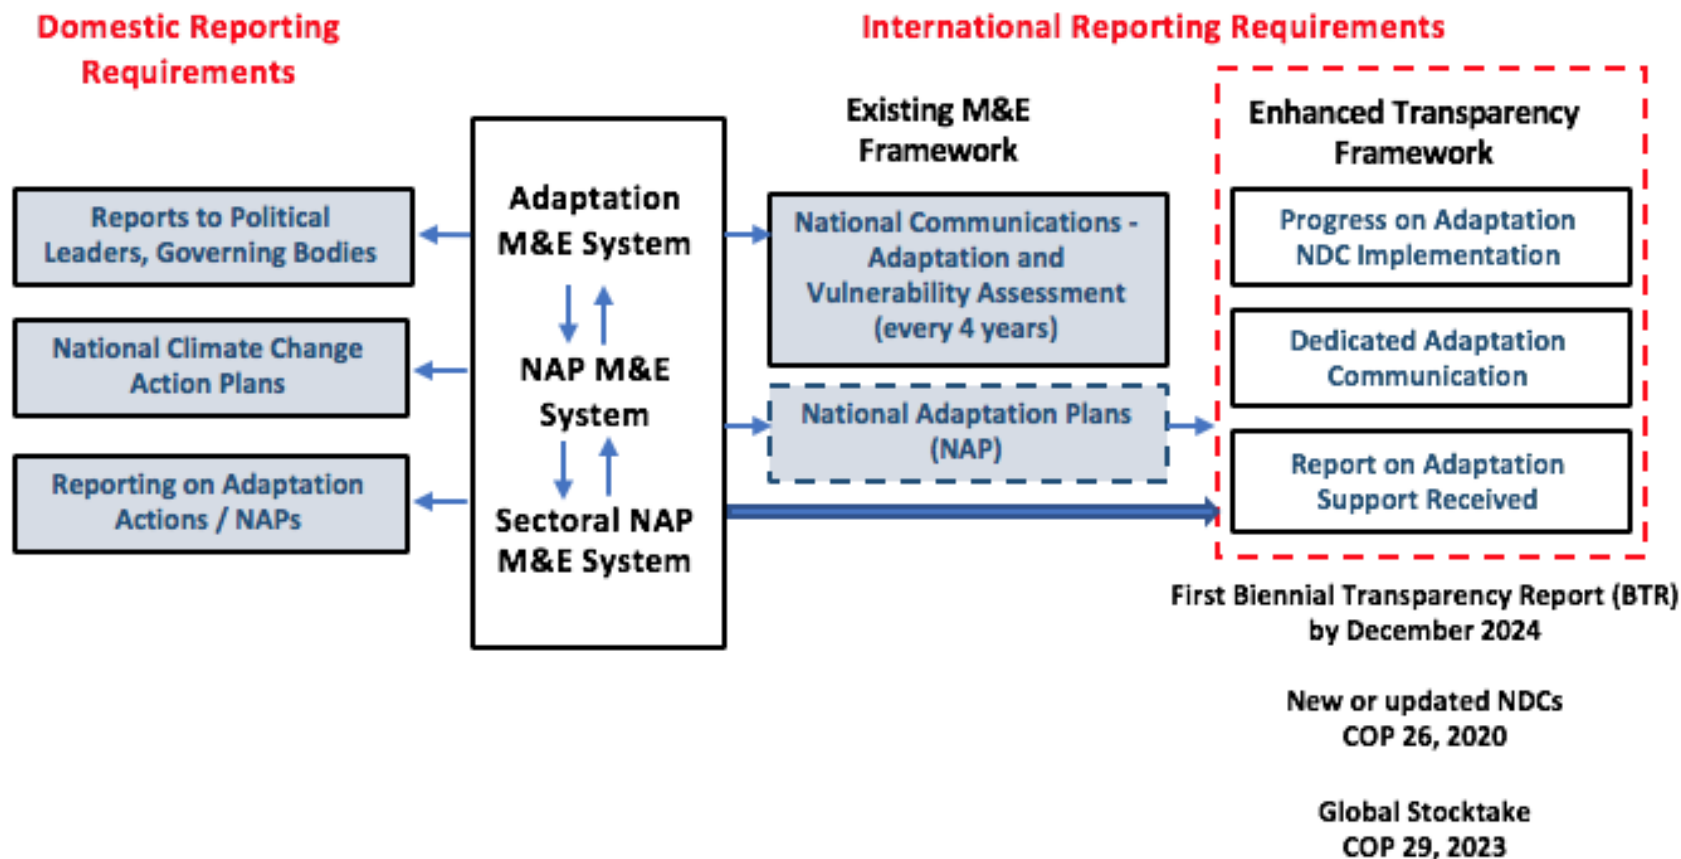

- (a) National circumstances, institutional arrangements and legal frameworks
- (b) Impacts, risks and vulnerabilities, as appropriate
- (c) National adaptation priorities, strategies, policies, plans, goals and actions
- (d) Implementation and support needs of, and provision of support to, developing country Parties

As appropriate, include additional information on the elements referred to in paragraph (e–i) of the annex, which includes: implementation of actions and plans including progress and results achieved, M&E

Guidance – Adaptation Committee working with IPCC WGII to draft supplementary guidance for voluntary use by June 2022 for consideration by SBs

Adaptation M&E: International and Domestic Reporting Frameworks

- What is the purpose of your adaptation M&E system?
- What are you trying to measure?
- Who will use the information?
- What can you do to move forward?
