Integral Management of Climate Change

A new cycle for the implementation of the Adaptation and Mitigation Actions of the NDC by 2030

Alexis Echevarría Ramirez
NDC process coordinator
Ministry of Environment of Perú
Wednesday, June 19, 2019

2. The Multisectoral Working Group for NDC – GTM-NDC

3. Participatory Process “Dialoguemos sobre las NDC”

5. Main national challenges for the implementation of the NDCs.
Historical Time Line of Integral Management in the face of Climate Change

Multisectoral Commission iNDC

April 2015

September 2015

July 2016

MWG-NDC

February 2017

April 2018

Climate Change Framework Law

Building process of Peruvian NDCs

December 2018

Multisectoral Group Work (MWG-NDC)

July 2016

2019 High Level on Climate Change Commission

December 2020

Multisectoral Dialogue about NDCs

April 2015

September 2015

February 2017

December 2018

December 2020
Multisectoral working group for implementation the nationally determined contributions (GTM-NDC)

Target:
Generate technical information to guide the implementation of the NDC presented to the UNFCCC.

Articulation and coordination between 13 ministries and the national planning center.

22 months (February 2017 – December 2018) with meetings each month were held to make decisions and monitor the progress of studies, proposals and determine the next steps.

Environment ministry fulfilled the role of technical secretary, both in leadership and in the provision of resources so that each sector can determine its sectoral roadmaps with adaptation and mitigation actions.

Sectoral managers (enlaces) is created with professionals in most ministries to bring technical support to the preparation of road maps.

On the other hand, a stakeholders involve strategy was developed to show the progress and relevance of this multi-sectoral, multilevel and multi-actor process.

The center is not climate change, but is an instrument that helps to meet the development goals of the country from its government institutions.
Mandates and results of the Multisectoral Working Group

**Mandates**

a) Develop guidelines to the evaluation and quantification of direct and indirect costs, environmental and social co-benefits, and other economic effects.

b) Prepare roadmaps or action plans to implement the enabling conditions of the NDC.

c) Report every six months and at the end of the group, the results and fulfillment of the mandate of the working group.

**Results**

- It was completed with the elaboration of 2 guiding instruments, both for adaptation and for mitigation.
- Economic evaluation studies of 30 measures of the NDC.
- 91 adaptation actions.
- 62 mitigation actions.
- Creation of the participatory process model of stakeholder involvement to facilitate the implementation of the NDC – “Let’s talk about NDC”.
- Monthly, the progress of the sectors and agreements was reported.
- The Ministry of Environment, as technical secretary of the working group, prepared the final report approved by the national institutions.
153 adaptation and mitigation actions

Adaptation actions: 5 thematic areas

- **Fishing and aquaculture**: 18 actions
- **Water**: 30 actions
- **Agriculture**: 17 actions
- **Forest**: 12 actions
- **Health**: 14 actions

Mitigation actions: 6 sectors of emission

- **Energy**: 38 actions
- **Waste**: 8 actions
- **Industrial processes**: 2 actions
- **Agriculture**: 6 actions
- **LULUCF**: 8 actions
- **Transport**: 8 actions

Transversal approaches: gender, intergenerational and intercultural

*Conditioned to the financing of international cooperation.*
Creation of a proposal and approval of the participatory process to involve state and non-state actors that facilitate the determination and implementation of the NDC.

Three main characteristics: Multisectorial, Multilevel and Multiactor.

A commitment of all Peruvians, therefore, we involve indigenous peoples, private sector, civil society, academia and international cooperation. More than 1500 key actors participated in the process of preparing roadmaps for adaptation and mitigation actions.

Finally, "Dialogue on the NDC" has become a platform for all state and non-state actors to facilitate the implementation of the NDC.
Management priorities

Integral Management of Climate Change

• In institutional terms: Framework Law on Climate Change and its Regulations. Prior Consultation (first semester 2019)

• In terms of action: Nationally Determined Contributions - NDCs.

This implies three challenges (Participatory Process “Multisectoral Dialogue”):

• Multisectoral implementation: National Commission on Climate Change
  High Level Commission on Climate Change

• Multilevel Implementation: Articulate work with regional and local governments.

• Multi stakeholder involvement: Encourage the involvement and investments of the private sector, the participation of indigenous peoples, civil society and other actors.
• The **Framework Law on Climate Change and the NDCs** mark a before and after in the integral management of climate change.

• A new management cycle oriented towards **multisector, multilevel and multi-stakeholder** climate action is necessary.

• The fulfillment of this objective will allow the effective **implementation of the NDCs**.

• **MINAM** has the role of **national authority** on climate change to achieve this goal.
Main challenges for the implementation of the NDC

- **Consolidate the national debate on NDCs** during the year 2019 and 2020, with a view to having a greater definition and achieving the goal of the NDC committed by Peru.

- **Achieve the implementation of the NDCs permanently**, through Framework Law on Climate Change and its Regulation that defines the creation of the High Level Commission on Climate Change and the focal point in the relevant sectors.

- **Identify financing from the institutional specifications for the sustainability of the actions**; as well as mechanisms that allow access and increase national funding for the implementation of the NDCs, linked the sectoral goals achievements.

- **Involve the private sector, indigenous peoples, civil society, academia and international cooperation** in the implementation of the NDCs.

- **Facilitate the adaptation and mitigation actions** identified and defined by the government sectors within the framework of the MWG-NDC to be incorporated into the planning, budgeting and investment instruments.
