UNFCCC-GIR-CASTT

Programme on Greenhouse Gases

UNFCCC-GIR-CASTT* Programme on Greenhouse Gases

*Climate Action and Support Transparency Training

Offered in collaboration by the secretariat of the United Nations Framework Convention on Climate Change (UNFCCC) and the Greenhouse Gas Inventory & Research Center of Korea (GIR) from 2017, UNFCCC-GIR-CASTT is a professional training on greenhouse gas (GHG) inventories to national experts from developing countries.

GHG inventories are a key source of information necessary to understand where each country, and the global community at large, stand in terms of GHG emissions. Through a tailored and focused approach, the programme aims to significantly boost the technical capacity of developing countries.

Since 2017, 58 trainees from 54 countries have successfully completed and they are contributing lessons learned from the training programme to their home countries to enhance their national capability responding to climate change.

The organizational collaboration will serve as a model for delivering a targeted professional training programme, and for future South-South cooperation that responds to the training needs of developing countries in the MRV area and the transparency framework.

About the GIR

As a government institute, the GIR serves as a think-tank on GHG inventory and mitigation. The GIR compiles national GHG inventory, supports establishing national and sectoral GHG reduction targets, and conducts research on the Korean Emissions Trading System.

For global cooperation, GIR has been organizing the International Greenhouse Gas Conference (IGC) as well as its unique GHG training programme since 2011.

Eligibility Requirements

- Current government officials, consultant and researchers
- Relevant experience in GHGs or climate change response-related field
- Entry-mid level professionals
- Bachelor's degree or higher
- Capability to understand lectures and give presentations in English (Candidates may be administered an English test via phone)
- Individuals with an intermediate IT proficiency

Deadline

Application should be submitted by **10 May, 2019 KST 24:00**

Please fill out online application form from following link

Key Programme Contents

- Reporting and Review under the UNFCCC and Paris Agreement
- GHG Inventory Compilation
- Sectoral GHG Estimation Methodology
- GHG Projections
- Hands on Exercise

Key Dates

15 April	Application Period Starts
10 May	Application Deadline
5 June	Announcement of Selected Applicants
21 July	Arrival in Korea
22 July	Programme Opening Ceremony
14 August	Closing Ceremony
15 August	Departure from Korea
