Background

In May 2017, policy-makers and government practitioners from more than 80 countries discussed how to advance the implementation of NDCs at the **Global NDC Conference** in Berlin. The conference focused on three topics: integrated governance, financing and transparency.

The organisers have launched the webinar series to make some of the key outcomes of the conference accessible to a wider audience and to further promote ambitious climate action. In several webinar sessions, speakers from (sub)national government institutions, the private sector, civil society, implementing organisations and think tanks will provide an insight into various issues that have been raised during the conference. The objective is to share knowledge about different aspects of NDC implementation and present emerging practices.
